(54) Title: DRYING RACK FOR A CLOTHES DRIER

(54) Bezeichnung: TROCKENGESTELL FÜR EINEN WÄSCHETROCKNER

(57) Abstract: The invention relates to a drying rack
(1) for the stationary drying of articles to be dried,
which can be installed in the drum (3) of a clothes
drier (2). Said articles can be knitwear or shoes that
must not be moved when dried even when the drum
(3) turns. In order for articles, especially wool arti-
cles, to dry faster, the drying rack (1) has at least two
spaced-apart surfaces (18, 19, 21-23) arranged one on
top of the other on which the articles to be dried can be
spread, thereby substantially enlarging the surface of
the articles to be dried. In this way, the moisture can
be better removed by the drying air current and larger
individual wool articles can be dried in the clothes
drier (2).

(57) Zusammenfassung: In der Trommel (3) eines
Wäschetrockners (2) kann ein Trockengestell (1) zur
ruhenden Anordnung von Trockengütern befestigt
werden. Dies können beispielsweise Wirkwaren
oder Schuhe sein, die während des Trockenprozesses
trotz sich drehender Trommel (3) nicht bewegt
werden dürfen. Um eine schnellere Trocknung
insbesondere von Wollegütern zu erreichen, weist
das Trockengestell (1) wenigstens zwei übereinander
beabstandet angeordnete Flächen (18, 19, 21-23)
auf, auf denen das Trockengut verteilt werden
kann. Damit kann die Oberfläche des Trockenguts

wesentlich vergrößert werden, so dass die Feuchtigkeit besser vom Trockenluftstrom abgeführt werden kann und es auch möglich
wird, größere Einzelstücke aus Wolle im Wäschetrockner (2) zu trocknen.

INTERNATIONAL SEARCH REPORT

International Application No
PCT/EP 02/00802

A. CLASSIFICATION OF SUBJECT MATTER
IPC 7 D06F58/04

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
IPC 7 D06F

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

WPI Data, EPO-Internal, PAJ

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	DATABASE WPI Section Ch, Week 199744 Derwent Publications Ltd., London, GB; Class F07, AN 1997-474577 XP002202001 -& JP 09 220399 A (HITACHI LTD), 26 August 1997 (1997-08-26) abstract; figure 4	1
X	US 4 908 959 A (KRETCHMAN GERALD L ET AL) 20 March 1990 (1990-03-20) the whole document -/-	1, 14

☒ Further documents are listed in the continuation of box C.

☒ Patent family members are listed in annex.

* Special categories of cited documents:

A document defining the general state of the art which is not considered to be of particular relevance

E earlier document but published on or after the international filing date

L document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

O document referring to an oral disclosure, use, exhibition or other means

P document published prior to the international filing date but later than the priority date claimed

T later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

X document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

Y document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

Z document member of the same patent family
